

1. The first example of the Prototype pattern was in \_\_\_\_\_ system in 1964.
2. The Gang of Four popularized and codified the Prototype Pattern in their book \_\_\_\_\_.
3. A prototype pattern is a \_\_\_\_\_ design pattern that focuses on creating objects by copying an existing object.
4. In the Prototype Pattern, a prototype object serves as a \_\_\_\_\_, and new objects are created by duplicating this prototype.
5. The \_\_\_\_\_ is responsible for creating new objects by requesting the prototype to clone itself.
